DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

Claims 192-220 are drawn to a method of making a plasma display comprised of, in part, bonding front and back plates then heating the plates in a dry gas atmosphere.

Claims 221-225 are drawn to a method of making a plasma display comprised of, in part, heating one panel in a dry gas atmosphere, then bonding the panels together.

Claims 226-243 are drawn to a method of making a plasma display comprised of, in part, heating both panels in a dry gas atmosphere, then bonding the panels together.

Claim 244 is drawn to a method of making a plasma display comprised of, in part, heating both panels, then bonding the panels together.

Claims 245-247 are drawn to a method of making a plasma display comprised of, in part, bonding the panels in a dry gas atmosphere, heating the panels, and exhausting the gases from the inner space of the panels before the temperature of the panels reduces to room temperature.

Claims 248-255 are drawn to a method of making a plasma display comprised of, in part, baking the panels while dry gas is circulated, bonding the panels, the bonding step is started before the temperature of the panels heated in the temporary baking step reduces to room temperature.

Claims 256-266 are drawn to a method of making a plasma display comprised of, in part, baking the panels, heating the panels, bonding the panels, the bonding step is started before the temperature of the panels heated in the temporary baking step reduces to room temperature.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims appear generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over

Art Unit: 2879

the prior art, the evidence or admission may be used in a rejection under 35

U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
